

ReadSignFlow – Campaign Completion Report

Campaign: Forklift safety procedure v3 – acknowledgement [SAMPLE – synthetic data, not a real customer]

Status: completed

Final – the campaign was completed when this pack was generated.

Deadline (UTC): 2026-04-30 16:00:00Z

Launched (UTC): 2026-04-14 08:00:00Z

Generated (UTC): 2026-04-20 09:05:12Z by sample.admin@example.com – Example Logistics Ltd (SAMPLE – synthetic data, not a real customer)

About this evidence

Each completion recorded here means the recipient opened the document, their own device confirmed reaching the end of it, and the recipient then acknowledged and signed. The end-of-document confirmation is reported by the recipient's browser: it is the recipient's attestation, not a measurement of reading time or comprehension.

The signature itself, its UTC timestamp, the signer's IP, the document SHA-256 hash and the audit trail in this pack are recorded by ReadSignFlow and are tamper-evident.

Each signed PDF receipt is included under signed/ exactly as it was stored at signing; signatures.csv names the file for each signature. manifest.json lists every file in this pack with its SHA-256 hash, so a later change to any file is detectable by recomputing the hash.

An engagement timeline appears below wherever a recipient's browser reported one – the section says plainly when none was recorded. The device reports what it did – the document opened, scrolled, a page displayed, the tab hidden or shown again, the document closed – and ReadSignFlow records the moment each report ARRIVED at the server. The timestamps shown are the server's and are the only part of the timeline ReadSignFlow witnessed; the scroll percentages, page numbers and dwell times are the recipient's device describing itself, and are capped on arrival. Together they evidence ENGAGEMENT – that a device interacted with the document over a period of time. They are not a measurement of reading and not evidence of comprehension, and no figure in the timeline should be read as proof that the document was read.

Summary

Recipients: 4 Completed: 2 (50%)

Overdue: 0 Exempt: 0 Declined: 1 Pending: 1

Signed PDF receipts included: 2 of 2 signatures (see signed/ and manifest.json)

Recipients (4)

Name	Email	Status	Completed (UTC)
Bailey Example	sample.two@example.com	Completed	2026-04-15 16:31:04Z
Dana Fictional	sample.four@example.co m	Pending	—
Casey Placeholder	sample.three@example.co m	Declined	—
Alex Sample	sample.one@example.com	Completed	2026-04-14 08:12:37Z
